

# Child Study Center Young Supporters

## About

### Who we are:

CSC Young Supporters are philanthropists in the Fort Worth community committed to raising awareness about the needs of children with developmental and learning disabilities. We are the young and young at heart who are passionate about advocating for the special children served through the Child Study Center and for the various ways to raise funds to help these children reach their full potential.

### What we do:

CSC Young Supporters raise awareness of the services offered through the Center through various networking events. We play a crucial role in recruiting participation in the various fundraising events throughout the year. Throughout the year, there will be opportunities for members to volunteer at the Center and to interact with the children we serve. It is our hope you will invest in your role with Child Study Center as your philanthropy to this great community!

Child Study Center

Child Study Center provides children with complex developmental and behavioral disabilities the highest quality diagnosis, treatment and education to help them achieve their full potential. The Center is located near downtown Fort Worth in a multipurpose facility that includes medical and psychological services. The Center also includes an educational facility for children with special needs (The Jane Justin School) and an intensive program for Behavioral Analysis of children with autism. Just as no child can be defined by a single trait or characteristic, no treatment can revolve around a single symptom – or utilize a one-size-fits-all therapy approach. Developmental and behavioral challenges are frequently multi-dimensional. At Child Study Center, not only do we understand that, we embrace it. We look beyond a single symptom and into the complex whole problem. By focusing on a child in context of his or her complete environment, our specialists can work with parents to bring a child's full potential to light.
